AHMAD MAHMOUD ALZAWAHRAH

Computer Engineer | Junior Network Engineer | Network Support | CCNA Certified

Zarqa, Jordan | +962 776 493 254 | zawahrahceo@gmail.com | Portfolio: https://rebrand.ly/A5H4M3A2D1

PROFESSIONAL SUMMARY

CCNA-certified Computer Engineering graduate (B.Sc., Hashemite University, Jun 2026) with hands-on Cisco IOS lab experience in switching, routing, IP services, and network security. Skilled in configuring and troubleshooting VLANs, OSPF, STP, EtherChannel, ACLs, NAT/PAT, and DHCP, with a Python, Linux, and Bash background for network automation. Targeting the MNO Network Engineer II role (mobile network operator environment) and related Network Engineer, NOC Engineer, and Network Support positions, with strong interest in IP/transport networks, SD-WAN, and telecom operations.

TECHNICAL SKILLS

Networking & IT: TCP/IP, OSI Model, Ethernet, MAC Addressing, ARP, IPv4/IPv6, IP Addressing, Subnetting, VLSM, VLANs, Access & Trunk Ports, 802.1Q, Inter-VLAN Routing, STP, Rapid PVST+, PortFast, EtherChannel, LACP, Static & Default Routing, OSPFv2/v3, DHCP, DNS, NAT/PAT, NTP, SNMP, Syslog, QoS, SSH, ACLs, Port Security, DHCP Snooping, Dynamic ARP Inspection, AAA, RADIUS, TACACS+, WLAN/WAN, SD-WAN, VPN Fundamentals, Cisco IOS CLI, Cisco Packet Tracer, Wireshark, Network Troubleshooting, Python, Bash, Linux, REST APIs, FastAPI, Git, and Network Automation.

CERTIFICATIONS

- **Cisco Certified Network Associate (CCNA)** — Cisco | Certified Aug 6, 2026 – Valid through Aug 6, 2029
- Python Programming — Udemy, Mar 2024 | Flutter Development — Udemy, Sep 2024

RELEVANT TRAINING & PROJECTS

Networking Trainee — Cisco Networking Academy (NetAcad), University of Jordan *Mar 2026 – Aug 2026*

- Completed intensive CCNA training covering switching, routing, IP services, network security, SD-WAN and network automation fundamentals.
- Configured and verified multi-VLAN switched networks with 802.1Q trunking, Rapid PVST+, EtherChannel, and inter-VLAN routing.
- Implemented OSPF, static routing, NAT/PAT, DHCP, and ACLs across multi-router lab topologies to deliver end-to-end connectivity.
- Diagnosed and resolved connectivity, addressing, and routing faults using a systematic layer-by-layer troubleshooting method.
- Hardened lab networks with port security, DHCP snooping, DAI, and device-access controls; documented all configurations and fixes.

AI Phishing Attack Detection System — Python · FastAPI · XGBoost · ModernBERT · Gmail API *Sep 2025 – Jun 2026*

- Built a security platform that analyzes email, URL, and network indicators to detect phishing, using machine learning and threat-analysis techniques(see more).

FREELANCE EXPERIENCE

Freelance Software Developer — Remote *Jan 2024 – Present*

- Deliver web applications and backend REST APIs using React, Node.js, and FastAPI for remote clients.
- Apply Python, Bash, and Linux scripting to automate repetitive technical tasks, a foundation for network automation.

EDUCATION

B.Sc. in Computer Engineering — Hashemite University *Oct 2021 – Jun 2026*

Diploma in Web Design (100 hours) — USA Training Program Academy

Jun 2023
